Indian Books in Print

The Indian Journal of Public Administration

This well-received text, designed for the students of MBA, BTech (Mechanical Engineering and
Industrial and Production Engineering) and MTech (Industrial Engineering and Management), has been revised and reorganized in its second edition. The book, divided into six sections, deals with the concepts of core maintenance and related auxiliary functions, core spares issues, related auxiliary spares functions, caselets and policy cases. This research-based study attempts to impart a comprehensive knowledge of maintenance and spare parts management, particularly in the Indian context. Illustrations, tables, caselets, cases and presentation of several topics in A-Z points add pedagogic value to the text.

**HANDBOOK OF MATERIALS MANAGEMENT**

This book provides an up-to-date account of the current understanding of climate change and global warming related to environment, climate, plant and vegetation growth. The aim of this book is to provide a platform for scientists and academics world-wide to promote, share, and discuss various new issues and developments in the area of plant and vegetation growth related to climate change. Over the next decades, it is predicted that billions of people, particularly those in developing countries, face shortages of water and food and greater risks to health and life as a result of climate change. Concerted global action is needed to enable developing countries to adapt to the effects of climate change that are happening now and will worsen in the future. The book will also enhance the understanding on issues related to climate change, giving a clear indication of a looming global warming crisis. Addressing global climate change is a monumental battle that can only be fought by the leaders of tomorrow, but future leaders are molded through education and shaped by the leaders of today.

**Bibliography of Agriculture**

Vols. 1- include Report of the Geological Survey, 1867- ; v. 32- include Review of the mineral production of India, 1898/1903- ; v. 75 consists of Professional papers, no. 1-16; v. 76 consists of Bulletins of economic minerals.

**The Geography and Politics of Afghanistan**

**Supreme Court Labour Judgments, 1950-1976: Employees' provident funds act, 1952 to Industrial Disputes Act, 1947, section 10**

This comprehensive research based, well received book, now in its Second Edition, continues to provide the most complete up-to-date coverage of the materials management discipline. It is the result of intensive and in-depth interactions of the authors with academic community, IIMM professionals as well as senior executives involved in materials, inventory, warehousing, logistics, supply chain, working capital and top management. This title reflects the wealth of experience gained by the authors in India and abroad in training, research, teaching and consultancy. This well-organised comprehensive book clearly analyses all the concepts, processes and applications of Materials Management, Supply Chain Management, Logistics Management, and Multimodal Transport. It covers basic principles and practices concerning these areas as well as to its application in Indian conditions. This textbook describes the concept of integrated materials management with the help of diagrams, charts, photos and solved examples, covering all the aspects of materials management. It

Project Management

provides a number of solved practical problems and examples for better comprehension. The suggestions of practising professionals, academicians and researchers have been appropriately incorporated in this book. An attempt has been made to strike a balance between conceptual frameworks and practical aspects of materials and its management. Intended primarily as a textbook for graduate students pursuing materials management courses in Indian universities, this comprehensive title will also serve as a ready reckoner for the executives practising in areas such as materials, logistics, SCM, purchase, warehousing and inventory management. The students of business management, engineering, Indian Institute of Materials Management (IIMM) diploma and other related programs/courses will find this book extremely useful.

Indexes materials appearing in the Society's Journals, Transactions, Manuals and reports, Special publications, and Civil engineering.

List of Research Workers

This book is an important addition to the knowledge of lobster research. The book complements other books published on lobster research and management as it focuses on Indian lobster fisheries and aquaculture developments where there have been nearly 350 research papers and reports and 19 PhD awards. The book has 15 chapters written by international experts covering many aspects of the biology of a number of spiny and slipper lobster species occurring in India and world oceans with maps illustrating global distribution of spiny lobster families, genera and species. An updated taxonomy and checklist of marine lobsters, the status and management of lobster fisheries in India and Indian Ocean Rim countries and a review of aquaculture research in India and other major countries have also been presented. The book is timely as the 2nd International Indian Ocean Expedition (IIOE) is currently underway (2015-2020), 50 years after the original IIOE (1959-1965), with some of the original lobster research on the biology and distribution of phyllosoma larvae being undertaken on the plankton samples collected during the first IIOE. Many of the chapters are contributed by the authors from Central Marine Fisheries Research Institute (CMFRI), which has been collecting fishery and biological data on lobsters since 1950 when lobster fishing began on a subsistence scale, followed by some industrial fishing for lobsters in different parts of India. Unfortunately, the development of some of these lobster fisheries was followed by overfishing due to lack of enforcement of regulations. The book provides a valuable addition to our knowledge of the biology, fisheries and aquaculture of spiny and slipper lobsters.
**Maintenance and Spare Parts Management**

A directory to the universities of the Commonwealth and the handbook of their association.

**The Europa Year Book**

The Book Is Primarily Intended To Serve As A Textbook For Undergraduate As Well As Postgraduate Students Of Management Studies. The Book Covers The Syllabus Prescribed By Most Universities/Institutes In India On The Subject Project Management. The Book Will Also Be Of Use To Commerce Students And For Students Of Professional Courses Like Aicwa, Aca And Cfa. All Aspects Of Projects, Viz., Project Identification, Project Appraisal, Project Planning And Scheduling, Project Implementation, Project Evaluation And Post Audit Of Projects Have Been Covered. The Book Also Touches Upon Finer And Practical Aspects Of Project Analysis And Implementation Which Will Be Of Great Use To Entrepreneurs. The Subject Matter Has Been Presented In A Simple And Lucid Form. Project Scheduling Techniques Have Been Explained In Detail With The Aid Of Graded Examples To Bring Home The Concepts Clearly. Though The Book Is Mainly Addressed To Students, It Will Be Equally Useful To Project Appraisers, Project Managers And Entrepreneurs As Well.

**The Supreme Court Journal**

Vols. 7-42 include the Proceedings of the annual meeting of the American Institute of Nutrition, 1st-9th, 11th-14th, 1934-1942, 1947-1950 (1st-8th, 1934-1941, issued as supplements to the journal).

Policy-relevant and up-to-date, Rural Development deals systematically with all aspects of socioeconomic rural development, using India as a case study. The Second Edition includes an integrated treatment of the principles, policies and management of rural development; new research and statistical data; illustrations and examples from current situations; the latest measures of rural
An unparalleled textbook on the subject, extensively revised to provide updates of various policies, strategies, and programs in the spheres of rural development and management in India. This time-tested textbook on the basic concepts, policy instruments, strategies, policies, programs, and management of rural development provides a comprehensive coverage of the subject. Primarily targeted at graduate and postgraduate students of rural development, this textbook also emphasizes the crucial role of human resources as both a means and an end to development. The book aims to equip the reader to hone skills in planning, formulation, monitoring, and evaluation in rural development programs. Key Features • Extensive analytical coverage of concepts, policies, and strategies in rural development • New sections added on various methodologies of estimating poverty, National Mission for Sustainable Agriculture (NMSA) and the National Livestock Mission (NLM), seven new social welfare-oriented programs, and planning machinery in India • Complete revision of all original tables and statistical figures along with new data on employment/unemployment and poverty scenario in India

Polymer coated textiles are known as engineered composite materials at macro scale. Coating can offer significant improvements to the substrate, mainly of the physical (like impermeability and fabric abrasion) and/or of overall chemical properties; as well as the appearance, by combining advantages of the components. Polymer coated systems employ various kinds of textile substrate structures available, mostly of technical textiles. Since there are a number of possibilities for different types of polymers and their combinations, textile structures as well as their combinations are possible; it is
widely open to creativities and almost every day some new innovative application is being introduced. Polymer coated textile industry, being parallel to the developments in the textile research, is so dynamic that, today, applications like reactive coatings with nanoparticles (with self cleaning, self sterilizing surfaces), systems with conductive polymer coatings to provide EM shielding, electronic textile systems -with body monitoring properties-, environmental responsive systems etc. are already somewhat classical and are considered almost left in the shade of incoming new developments. This book is an up-to-date summary of the subject by considering the passage from conventional to emerging technologies. Criteria for selection of the coat and textile are considered and the manufacturing basics of the system are summarized. Emerging technologies and applications (including smart, intelligent and nanostructured applications) are completed by testing and quality control methods of these systems. The book is written for all that are interested in this interdisciplinary area, it certainly will prove to be of great help to textile and polymer technologists, to engineers, to scientists, as well as to students.
